

Integration Architect

Archimiddle delivers **consultancy in IT architecture and middleware** to **support customers** with architectural decisions and implementations. The IT landscape evolves rapidly from data and application silos to agile service oriented solutions, increasing the importance of **integration**, both between services, and with legacy applications.

This opens new opportunities for business, but at the same time, organizations realize that implementing service integrations requires a new approach to IT projects: governance becomes a key aspect.

Job description

As an integration architect, you will be working as a team lead and advisor in diverse integration environments.

You are able to take responsibility over architectural decisions, and you can help customers implementing governance procedures.

You have a broad knowledge of integration techniques and project methodologies and you can lead and guide development teams, whether it is straight application integration, or it is a top-down business process approach.

You will take responsibility for following tasks:

- Take architectural decisions, both conceptual and technical
- Translate business processes into architectural requirements
- Guide the implementation of governance procedures
- Lead a team of developers in service implementation and integration
- Define an architecture roadmap for several years, supporting the business goals

Your profile

We are not just looking for people matching all skills, but also for experienced people with a high potential in these fields.

Conceptual skills

- Enterprise Architecture, e.g., TOGAF
- Business Processes, e.g., BPMN
- Enterprise integration patterns
- Service oriented architecture
- Cloud architecture

- Contract-first design
- Governance

Technical skills

- Web services, SOAP, REST
- Enterprise Service Bus, e.g., OSB, Mule ESB, etc.
- Relevant Java EE frameworks
- Service orchestration tools, e.g., Oracle SOA Suite
- Service security frameworks, e.g., WSSE, Oath2, etc.
- Service repository

Soft skills

- Communication skills
- Creative thinking
- Documentation skills
- Presentation skills

What we offer

We offer you a competitive salary with extras such as a company car incl. fuel, group and health insurance, laptop, and above all, an inspiring work environment with lots of room for personal improvement and knowledge expansion.
